### **Double Patenting**

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 3-7, 15-19, 25-36 and 51-55 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 and 10-14 of U.S. Patent No. 6,611,938. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the limitations of the rejected claims are claimed in at

least one of the claims 1-8 and 10-14 of the patent 6,611,938, and there is no reason why the rejected claims could not have been presented in the patent 6,611,938.

The following table shows the claims in 10/601,639 that are rejected by corresponding claims in the patent 6,611,938.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999

(AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b).

Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 39-41 are rejected under 35 U.S.C. 102(e) as being anticipated by Roohparvar (5,864,569).

As per claims 39 and 41, Roohparvar discloses a Flash memory comprising:

a memory sector with a plurality of flash memory cells;

a data buffer which outputs a read data read from the memory sector to an external device;

an error correcting circuit which output the read data..., wherein

when the read data read is output from the data buffer to the external device again, the error correction circuit corrects the error read data. (See Figure 3, col. 1, line 41 to col. 3, line 33).

As per claim 40, Roohparvar further discloses a status output circuit which outputs an error state to the external device (col. 4, lines 14-20).
